

When with friends

Friendship and new acquaintances are nice and positive aspects in life, but don't be too careless, though.

Select your companions and attend only those events organized by people you already know.

If you have to go back home late, get someone to take you home or pick you up.

Do not react to provocations. There are groups wandering around only to rob or beat up the unlucky people they meet.

If you ride a moped or a motorcycle take a familiar route, so that if needs be, you can take an alternative road.

Avoid alcohol, cigarettes and most of all narcotic substances: be aware these substances are very harmful.

Do not take up any challenge or engage in dangerous and silly jokes; a stupid trick with a weapon can cause a serious accident.

Follow any advice on preventing infections carefully, specially as regards venereal diseases and Aids.
